Inserción de datos Base de Formula 1

Inserción de datos en tablas en SQL

Sergio Ibarra

Se presenta a continuación un resumen de los pasos que se siguieron para importar los datos en las tablas de la base de datos Formula1

Se llevó a cabo la creación y alimentación de datos de en las distintas tablas

Creación de tablas

-Para revisar las Keys (Primary Key and Foreign Key) de una tabla SELECT * FROM sys.key_constraints WHERE parent_object_id = OBJECT_ID('Drivers');

-Para revisar las Keys (Foreing Key) y las tablas que dependen de una tabla que no permite borrar
`SELECT * FROM sys.foreign_keys WHERE referenced_object_id = OBJECT_ID('Drivers');`

Para intentar otro formato de fecha `ALTER TABLE Drivers ALTER COLUMN DOB DATETIME2;`
